To Whom It May Concern:

I am writing to confirm and endorse the participation of Jinchang Li in a research opportunity under my supervision as part of his Curricular Practical Training (CPT) application. Jinchang Li will be working on a project on Physical Oceanography. His responsibilities include designing machine learning architectures and computational pipelines to train and validate open boundary conditions for ocean models.

The research engagement will take place from **May 28, 2026** through **August 25, 2026**. During this period Jinchang Li is expected to work approximately 30 hours per week on site and remotely as appropriate to the research tasks.

This is an **unpaid research opportunity**. The position is offered as an academic and professional training experience that is directly related to and integral to his field of study.

The work Jinchang Li will perform is directly connected to his academic program and will provide training that is essential to his development as a researcher in computational fluid dynamics and ocean modeling. I strongly support his CPT application and am pleased to serve as his research supervisor for the duration of this project.

Please do not hesitate to contact me if any additional information is needed regarding this endorsement or the nature of the research activity.

Sincerely,

Professor Alistair J. Adcroft
Senior Research Oceanographer
